- Bowl this team once during season
- Bowl this team twice during season

Every attempt was made to develop a schedule that is as fair as it could be considering the league format. WITHOUT a position round included mid-league, this schedule results in each team bowling all 17 opposing teams at least one time. It works out where each team will actually bowl 11 out of the 17 teams twice, but it's just luck of the draw at the beginning of the season as far as which teams those are.
